

TAMPA ELECTRIC'S DRIVE SMARTSM program

- 🚗 Tampa Electric's new Drive Smart program is looking to install more than 200 plug-in electric vehicle (EV) chargers at qualifying business customer locations in 2022
- 🚗 We will contribute up to \$5,000 toward equipment and installation costs for each charge port
- 🚗 Participating businesses will be responsible for the electric service consumption to each location, at standard Tampa Electric rates
- 🚗 Businesses have the option to charge a fee to EV drivers for using the new charging ports.
- 🚗 As part of this exciting pilot program, Tampa Electric will own and maintain the chargers during the pilot
- 🚗 If interested, please complete the online application at:
